

give a broader picture of where these plants occur in Australia.

State abbreviations

NSW – New South Wales (including the Australian Capital Territory)
 Vic – Victoria
 Tas – Tasmania
 SA – South Australia
 WA – Western Australia
 NT – Northern Territory
 Qld – Queensland

States in green text indicate that the species is considered native to part or all of that state.

Note For the purposes of this book the ACT has been included within NSW, and the NT referred to as a state.

The South-East Region There are no agreed regional boundaries for Australia, but geographic and climatic differences broadly divide it into four regions: the Arid Centre, the Tropical North, the South-West of Western Australia and the South-East (Muyt 2001). In this book the South-East Region includes all of Victoria, Tasmania and the Australian Capital Territory, the southern half of New South Wales and the south-eastern section of South Australia.
